Foundation details
-600x200 thick strip foundation to structural eng. details
-50mm thick cement sand screed floor finish on,
-150mm thick concrete slab with BRC mesh A142,
-1000 gauge polythene sheet as Dpm,
-Gladiator anti-termite on,
-100mm stone dust
-300mm thick well compacted hardcore to Eng. details
-200mm thick masonry fdn stone walling
N.B: Depth of fdn to be determined on site
NOTES:

- All dimensions are in mm unless otherwise specified.
- Drawings are not to be scaled only figured dimensions to be used.

CONSTRUCTION:

- All slab at ground floor to be poured over 100 gauge polythene sheet on 50mm thick murrum bedding on hardcore.
- All soil under slab and under foundations to be protected for termite control.

- GATE: 3 sliding doors

STRUCTURAL:

- All black cotton soil to be removed from all buildings and paved surfaces.
- For all RC work refer to structural Engineer’s details.
- Depth of foundations to be determined on site by SE’s approval.
- All soil less than 150mm thick to be reinforced with steel at 150mm centres.
- All adjacent RC work to be bedded with steel at every alternate course.

MECHANICAL:

- All plumbing and drainage to comply with relevant local authority.
- SVP denotes soil vent pipe to be provided at the head of the drainage system.
- Storm drain pipes to comply with BS 556 specification.
- All underground foul and waste drain pipes shall be uPVC to comply with BS 5255.
- No chases will be allowed for pipes, sleeves will be allowed with written approval of SE’s.
- No cutting of concrete without express approval of the architect or SE.
- All testing of pipes must be completed before plastering.

ELECTRICALS:

- All conduits must be laid before plastering.

ELEVATIONS:

- E-1: Elevation
- E-2: Elevation
- E-3: Elevation
- E-4: Elevation

REVISED:

NOTES:

GENERAL:
All dimensions are in mm unless otherwise specified. Drawings are not to be scaled only figured dimensions to be used.

CONSTRUCTION:
- all slab at ground floor to be poured over 100 gauge polythene sheet on 50mm thick marbles slaming on hardcore
- all soil under slab around and under foundation to be protected for termite control.

CIVIL:
- all soil on cut embankment to be stabalized
- the slope not to exceed the natural angle of repose.

STRUCTURAL:
- all black cotton soil to be removed from all buildings and paved surfaces.
- for all RC work refer to structural Engineers details.
- all slab at ground floor to be poured over 100 gauge polythene sheet on 50 mm thick murram blinding on hardcore.
- all soil under slab around and under foundation to be protected for termite control.

MECHANICAL:
- all plumbing and drainage to comply with relevant local authority.
- all inspection chambers covers and framing shall be cast-iron minimum slope in the drains pipe to be 1 in 100.
- no chases will be allowed for pipes, sleeves will be allowed with written approval of SE’s.
- All mechanical works must be co-ordinated with electrical and any conflict must be clarified before work begin.

ELECTRICALS:
- all conduits must be laid before plastering.
- all testing of pipes must be completed before plastering.

CHANGING ROOMS FOR SLAUGHTER HOUSE
**GENERAL**

All dimensions are in mm unless otherwise specified. Drawings are not to be scaled only figured dimensions to be used.

**CONSTRUCTION**

- All slabs at ground floor to be poured over 100 gauge polythene sheet on 50mm thick murram blinding on hardcore.
- All soil under slab around and under foundation to be protected for termite control.

**Civil**

- All soil at cut embankment to be stabilized, the slope not to exceed the natural angle of repose.

**Structural**

- All black cotton soil to be removed from all buildings and paved surfaces.
- For all R C work refer to structural Engineers details.
- Depth of foundations to be determined on site by SE approval.
- All walls less than 150mm thick to be reinforced with main iron at every alternate course.
- All required R C work and necessary wallass to be bedded with main iron to every alternate course.

**Mechanical**

- All plumbing and drainage to comply with relevant local authority.
- All underground soil vent pipes to be provided at the head of the drainage system.
- Storm drain to comply with BS 556 specification.
- All inspection chambers covers and framing shall be cast iron.
- Minimum grade of bends shall be 1/10.
- No chases will be allowed for pipes.
- Sleeves will be allowed with written approval of SE's.
- No cutting of concrete without express approval of the architect or SE.
- All testing of pipes must be completed before plastering.
- All mechanical works must be coordinated with electrical and any conflict must be clarified before work begin.

**Electricals**

- All conduits must be laid before plastering.
