CHALLENGES

- Budgetary allocations for road construction and maintenance are inadequate. Some of the projects had to be reviewed because the budgetary allocations were not sufficient for the scope of works required. This has caused a significant delay in the implementation of these projects.
- Lack of capacity of our contractors in terms of skills and resources. A significant number of contractors lack the machinery to implement projects and thus end up relying on hiring the same machines which slows down the pace of projects.
- Lack of supervision vehicles.

This makes it difficult to supervise projects effectively throughout the project implementation.

- Lack of adequate number of personnel to carry out supervision.

The department requires more staff to carry out routine and timely supervision of projects as well as to respond to emergencies experienced especially during the rainy season.
